Comments: While we appreciate the need for commercial business in town, North Grafton seems to bear the brunt of the worse of projects - from rows of used car dealerships to a propane truck farm to a National Grid substation. The parcel at Wyman Gordon should be considered carefully. This area is what welcomes visitors to Grafton. The area, already crowded with used car dealers, graffiti painted pizza shops, etc., is in desperate need of proper town planning create an attractive - as well as business functional - section of town. To add a warehouse across a crowded residential area, where traffic already backs up at Brigham Hill and Rt 122 as well as to the Pike, will add to the continued decline of what should be a well managed commercial district. Very few prospective residents and businesses actually go the our Common. It's time to stop and thoughtfully plan North Grafton. Thank you.
